History. Its activity was first identified in 1876 by FrÃ©dÃ©ric Alphonse Musculus as a soluble ferment. In 1926, James B. Sumner, showed that urease is a protein by examining its crystallized form. Sumner's work was the first demonstration that a protein can function as an enzyme and led eventually to the recognition that most enzymes are in fact proteins.

Consider watching an introduction to GAMSAT stoichiometry below. Over the last few months, Gold Standard GAMSAT has added hours of new teaching videos - from very basic to advanced science topics - to our already extensive collection at www.gamsat-prep.com (currently we have an unrivalled 70 + hours of videos with helpful teaching). Many of our new videos also include GAMSAT sample questions.

The kilogram or kilogramme (symbol: kg) is the base unit of mass in the International System of Units (SI). Until 20 May 2019, it remains defined by a platinum alloy cylinder, the International Prototype Kilogram (informally Le Grand K or IPK), manufactured in 1889, and carefully stored in Saint-Cloud, a suburb of Paris. After 20 May, it will be defined in terms of fundamental physical constants.

Kilogram - Wikipedia

My first comment is this: WOW! This test was really long! I timed myself taking it and I carefully and thoughtfully did each problem at a nice easy pace (for me) and considering that I really screwed up on (1) (c) and had to re-do the whole thing b/c I was an idiot, I still finished the first 3 questions in 57 minutes with no errors.
