The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering fat into soap, making ...

11. SAFETY FIRST - Chemistry experiments should be done in a controlled, carefully supervised environment such as a school lab (laboratory) or learning center lab unless specifically designed to be safe as a home experiment. Children must be constantly supervised by informed responsible adults educated in lab safety. Never work alone. If you plan on doing any experiments of any kind, pay ...
